

Concept Clay ORIGINAL FORMULA!

A revolutionary non-scratch surface cleaning putty which simply and safely lifts away many surface problems in body paintshops.

VERSATILE

Removes overspray and industrial fall-out from paintwork, glass, plastic, aluminium and chrome. Saves an incredible amount of time and hassle over conventional procedures.

Removes paint overspray, eg dry dust, airborne drift, overspray on glazed surfaces etc.

Removes paintwork contaminants (eg emulsion spatter).

No hazardous solvents or acids.

No scratching, no scraping, no compounding, no flatting.

No problems of plastic staining from compound water mark

Directions for Use:

Wash the surface thoroughly with a shampoo to remove surface dirt and grit.

Check Concept Clay is not contaminated with any heavy dirt particles that could scratch.

Cut off a quarter of the brick, roll into a ball then flatten into a pancake shape.

Wet surface to be decontaminated with Clay-Lube, and on face of clay pancake.

Using this flattened piece, move in an overlapping pattern similar to sanding.

Keep surface lubricated to reduce marring.

Continue and repeat process until surface is contaminant free

Typical Specification:

Composition : A blend of polybutene, calcium carbonate and pigment.

pH : N/A

Colour : Blue

Odour : Characteristic

Shelf Life : Minimum 4 years

Packaging : 200g bar

CODE: 134
