

DELTA SAN

HEAVY DUTY INDUSTRIAL SANITISER CLEANER – DEGREASER - CONCENTRATE

Total Cleaning Power: Delta San combines the high performance cleaning power of Delta Force with a fully tested and proven bacterial killing action (effective against Gram + ve and Gram – ve bacteria: see test results below).

Food Industry: Delta San is the ideal food plant cleaner sanitiser: dissolves and disperses fats, blood stains, shortenings in food processing and catering.

Animal Handling: The ideal cleaner sanitiser for animal handling equipment and vehicles, animal housing, kennels, veterinary buildings, abattoirs, meat processings etc.

Highly Concentrated: For real economy in use – controlled foam action gives visible application through high pressure cleaning.

Environment Friendly: The surfactant(s) contained in this preparation complies (comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

Independent Laboratory Tested: The European Suspension Test (EST) evaluates the effectiveness for the antimicrobial activity of disinfectants in food hygiene. Contact time 5 minutes to give a 5 log reduction (microbicidal effect >5) in bacterial count. This represents a 99.999% kill. Delta San was tested under dirty conditions (Bovine albumin at 1%) at a dilution of 1:80 and under clean conditions (Bovine albumin at 0.03%) at a dilution of 1:100 and passed against the following bacteria:

Enterococcus faecium
Proteus mirabilis
Pseudomonas aeruginosa
Saccharomyces cerevisiae
Salmonella enteritidis
Staphylococcus aureus

A copy of the official report is available on request.

Approvals and Registrations:

DE: BAuA : Registriernummer: N-90044

NZ: MAF Approved C31 [New Zealand Ministry of Agriculture & Forestry].

Directions for Use: Delta San can be applied by low pressure spray, scrub or high pressure wash, or mop as required.

Dilutions for Cleaning & Sanitising:

Heavy soiled surfaces: 1 part to 80 parts water.

Lightly soiled surfaces: 1 part to 100 parts water.

Note: Do not allow Delta San to dry out on paintwork aluminium or light alloy surfaces as staining may occur.

Typical Specification :

Composition : A complex blend of non-ionic and cationic surfactants, soil suspending and sequesting agents with a quaternary ammonium biocide, water and food safe dye trace.

Appearance : Clear liquid

Colour : Cherry red

S.G. : 1.08

pH : 13.5

Odour : Mild

Shelf Life : Two years minimum in unopened containers at ambient temperature. Protect from freezing.

Packaging : 5L, 25L, 200L plastic containers.

Delta San is a Trade Mark of Concept Chemicals & Coatings Ltd

CODE: 129
