

## DELTA-50 NTA Free

### SUPER CONCENTRATED TRAFFIC FILM REMOVER & DEGREASER

**Delta-50:** A new, highly concentrated traffic film remover, multi-purpose cleaner and degreaser. Ultra-efficient and economical across a wide variety of cleaning applications.

**Versatile:** Delta-50 has been specifically formulated to offer a wide range of dilution options; cars, commercials, industrial and agricultural cleaning applications.

**Powerful cleaning action:** Delta-50 uses an advanced surfactant/detergent system to deliver high powered cleaning without dulling painted surfaces.

**Concentrated Economy:** One 25L barrel of Delta-50 concentrate can clean up to 500 cars (light soiling).

**Industry/Commercial:** Delta-50 is suitable for general purpose cleaning & degreasing of metal components (non-aluminium).

**Workshop-Garage Floors:** Safely removes oil, diesel, dirt etc. from concrete, tile and painted floors.

**Environment Friendly:** The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

**Directions for Use:**

Delta-50 can be applied through high pressure cleaner or by low pressure pre-spray. For heavy duty degreasing and cleaning work the use of hot water (max 65<sup>o</sup>c) at high pressure will significantly enhance the cleaning action. Dilution and feed rates must be determined by the job in hand.

Cleaning & Degreasing	Low Pressure	High Pressure
Light Soiling	1:40	1:20
Medium Soiling	1:30	1:15
Heavy Soiling/Degreasing	1:10	1:5

**Rinsing:** Use high temperature hot water to help clean-off heavy grease deposits etc. during rinse off.

**Application Note:** Do not allow material to dry out on any surface or staining may occur. After use rinse away thoroughly with plenty of cold water. In very hot weather we recommend pre-cooling of surfaces being cleaned by pre-spraying with cold water before application of detergent solution.

**Typical Specification:**

- Composition : A complex blend of non-ionic and cationic surfactants coupled with chelating agents and water.
- Appearance : Clear liquid
- pH : 13.5
- Colour : Opaque
- SG : 1.11
- Odour : Soapy Characteristic
- Shelf Life : 2 years minimum in unopened containers at ambient temperature. Protect from freezing.
- Packaging : 25L, 200L & 1000L containers.

Delta-50 is a Trade Mark of Concept Chemicals & Coatings Ltd
