

DELTA-50 PLUS

SUPER CONCENTRATED TRAFFIC FILM REMOVER & DEGREASER

Delta-50 PLUS: A new, highly concentrated traffic film remover, multi-purpose cleaner and degreaser. Ultra-efficient and economical across a wide variety of cleaning applications.

Versatile: Delta-50 PLUS has been specifically formulated to offer a wide range of dilution options; cars, commercials, industrial and agricultural cleaning applications.

Powerful cleaning action: Delta-50 PLUS uses an advanced surfactant/detergent system to deliver high powered cleaning without dulling painted surfaces.

Concentrated Economy: One 25L barrel of Delta-50 PLUS concentrate can clean up to 500 cars (light soiling).

Industry/Commercial: Delta-50 PLUS is suitable for general purpose cleaning & degreasing of metal components (non-aluminium).

Workshop-Garage Floors: Safely removes oil, diesel, dirt etc. from concrete, tile and painted floors.

Environment Friendly: The surfactant(s) contained in this preparation complies (comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

Directions for Use:

Delta-50 PLUS can be applied through high pressure cleaner or by low pressure pre-spray. For heavy duty degreasing and cleaning work the use of hot water (max 65°C) at high pressure will significantly enhance the cleaning action. Dilution and feed rates must be determined by the job in hand.

**Low Pressure
(Pre-Spray)**

TFR	Cold Degreasing
1:20/1:30	1:12

**Hot
High Pressure [at nozzle]**

TFR	Degreasing
1:225	1:110

Rinsing: Use high temperature hot water to help clean-off heavy grease deposits etc. during rinse off.

Application Note: Do not allow material to dry out on any surface or staining may occur. After use rinse away thoroughly with plenty of cold water. In very hot weather we recommend pre-cooling of surfaces being cleaned by pre-spraying with cold water before application of detergent solution.

Typical Specification:

Composition	: A complex blend of non-ionic and cationic surfactants coupled with chelating agents and water.
Appearance	: Clear liquid
pH	: 13.5
Colour	: Opaque
SG	: 1.07
Odour	: Soapy Characteristic
Shelf Life	: 3 years minimum in unopened containers at ambient temperature. Protect from freezing.
Packaging	: 25L, 200L & 1000L containers.

Delta-50 PLUS is a Trade Mark of Concept Chemicals & Coatings Ltd
