

## MICRO-GREEN XTRA

### COMBINATION 2-in-1 CONCENTRATED WINTER CLEANING MICRO-EMULSION & TFR MICRO-EMULSION CONCENTRATE FOR HEAVY DUTY CLEANING/DEGREASING OF TRAFFIC FILM TAR/ASPHALT

**Powerful winter cleaner:** This highly concentrated micro-emulsion cleaner is developed for the most extreme conditions, fully compliant to exceed the latest detergent regulations.

**Petroleum solvent free:** Micro-Green Xtra is a new generation of cleaner, totally free of kerosene based petroleum solvents.

**D'Limonene free:** Micro-Green Xtra does not contain any environmental hazards traditionally associated with advanced high performing micro-emulsion cleaners. No dead tree/dead fish aquatic environmental hazards as the product does not contain terpenes.

**Environment safe:** Both the emulsion and surfactant system contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

**User friendly concentrate:** In its diluted ready for use solution, Micro-Green Xtra is Non-Hazardous in use.

For economy in use 1 litre of concentrate will typically make 11 litres of pre-spray.

**Versatile:** A highly concentrated professional product providing performance cleaning for passenger vehicles, light/heavy commercials vehicles and industrial use.

**Paint & trim Friendly:** A highly advanced micro-emulsion/surfactant detergent system delivers a safe cleaning action on paintwork and trim. Will not mark or dull surfaces even after repeated use.

**Directions for use:**

Recommended method of application is by low pressure spray. Micro-Green Xtra is a fully concentrated product which must be pre-diluted before use, with **up to 10 parts water**, depending on the degree of soiling. For heavy duty cleaning after application the recommendation would be to follow with a high pressure, hot water rinse (65c)

Application note: Do not allow product to dry out on any surfaces or staining may occur. After use rinse thoroughly with hot or cold water

**STEP 1.**

**Low Pressure Pre-spray:**

Apply the Micro-Green solution working around the vehicle from the bottom upwards, in the same method as you would apply a conventional Traffic Film Remover.

NOTE: Follow the standard application/cleaning procedure of allowing detergent dwell time, taking care to prevent material from drying out on surfaces or staining may occur.

Finally rinse off thoroughly at high pressure with plenty of hot or cold water.

**Typical Specification:**

Composition	: A complex blend of non-ionic and anionic surfactants coupled with glycol solvents, chelating agents, water and perfume.
Appearance	: Slightly viscous liquid
Colour	: Pale transparent
S.G.	: 1.03
pH	: 13.5
Odour	: Mild
Shelf Life	: Minimum two years in unopened containers at ambient temperature. Protect from freezing.
Packaging	: 25L, 200L & 1000L containers.

Micro-Green Xtra is a Trade Mark of Concept Chemicals & Coatings Ltd
