

'OK' GRAFFITI REMOVER #1

Highly Effective:

O.K. Graffiti Remover removes all types of graffiti from practically all surfaces including felt tip, magic markers, biro crayon, and paint.

Thickened Gel:

Allows for vertical surface treatment - helps prevent run off.

Controllability:

Unlike some aggressive formulations which can cause rapid damage to original surface, O.K. Graffiti Remover allows for selective and controlled treatment.

Directions for use:

Read carefully before commencing treatment.

Shake can well before use.

Spray directly onto the graffiti.

Leave to dissolve graffiti, then wipe off and wash residue away with water.

Typical contact times:

Ball point 2 - 5 mins;

Aerosol Paint 5 - 30 mins;

Crayon 10 - 30 mins.

It may be necessary to repeat the process on stubborn or aged stains.

It is safe to extend the contact time to ensure effective removal from stone and porous brick work.

NB. On plastics and painted surfaces it is always advisable to test a small inconspicuous area to ensure that no damage will occur. Leave on for the minimum of time.

For known sensitive plastics we recommend the use of Plastic Safe Graffiti Remover #648.

Typical Specification :

Composition : A blend of water soluble solvents, and surfactants in an aqueous base.

Appearance : Amber Gel

S.G. : 0.92

F.P. : 38°C

pH : 8.5
