

POLAR PLUS DE-ICER -40°C

Polar Plus De-Icer is a non-flammable blend of glycol and ethanol to provide a highly concentrated rapid acting de-icer.

This concentrated power melts ice down to -40°C

Adds a clear glycol film to your screen to prevent re-freezing.

Dilution options:

Use un-diluted: effective to -40°C

2 parts de-icer : 1 part water : -21°C

1 part de-icer : 1 part water : -13°C

Typical Specification :

Composition : A blend of Glycol, Ethanol, Water and Dye.

Appearance : Free Flowing Liquid

Colour : Dark Blue

F.P. : > 65°C

S.G. : 1.045

Solubility : Fully miscible

Shelf Life : 4 Years minimum in unopened containers.

Packaging : 5, 25, 200, 1000 L

Directions: Use Neat

1. Remove loose snow.
2. Pour contents into spray applicator.
3. Adjust sprayer nozzle to fine spray for thin ice; strong jet for thicker ice.
4. Spray from top to bottom in horizontal sweeps across the screen allowing de-icer to flow down screen to maximise de-icing function.
5. Once ice has melted, clean screen with wipes or clean cloth.
