

# RONDO WHEEL CLEANER

**HIGH STRENGTH, TOP PERFORMANCE ALLOY & STEEL WHEEL CLEANER**

**Superactive Wheel Cleaner:** For rapid removal of stubborn black brake dust and residues associated with alloy/steel wheels and plastic wheel trims.

**Directions:** READ CAREFULLY

Remove any loose/excess dirt. Apply using either brush or low pressure spray. Agitate if necessary to assist penetration. Leave cleaner in contact for up to 10 minutes then rinse off thoroughly with clean water.

**Caution:** Take care to prevent contact with surrounding paintwork or plastics as contact could cause staining. Any splashes must be washed off immediately with water.

**NOTE:** Chrome Cleaning. Care must be taken when using this powerful product for cleaning/removing rust from chrome. Contact time 2-3 minutes then rinse off thoroughly. For old or poor condition chrome test a small inconspicuous area first to check plating is not adversely affected.

**N.B.** Do not use on magnesium or anodised alloy wheels or on any aircraft components.

**Typical Specification :**

- Composition : A complex blend of acids, surface active agents, corrosion inhibitors, water.
- Appearance : Clear liquid
- Colour : Straw white
- S.G. : 1.12
- Odour : Slight acidic
