

# BOAT WASH

**Wash Down concentrate. Low foam with hydrophobic high-gloss finish. pH neutral.**

Super-concentrate UV Boat Wash is a low-foaming biodegradable shampoo and surface conditioner designed for regular washdowns of all topside hard surfaces.

Unique Nano polymer chemistry developed to maintain a superior high-gloss finish with every washdown.

Hydrophobic sheeting effect drives rinse water away to reduce drying time and water spotting.

Streak-free: no smearing on glass. pH neutral, acid and alkali free.

## Directions:

Do not use at excessive concentrations, as the correct dilution rates are important for optimum performance and hydrophobic qualities.

Rinse surface thoroughly prior to washing.

Add 1oz /30ml of UV BOAT WASH per gallon (3.785L) of warm or cold water

[Note: a 1L clic-loc cap, brim-full is 10ml; a 5L cap is 0.5oz/15ml].

UV BOAT WASH is a LOW-FOAM PRODUCT - DO NOT EXCEED THE RECOMMENDED DILUTION

Using a soft non-abrasive sponge or brush, apply the solution to wash the surface whilst still wet from the initial rinsing.

Wash small sections of large surface areas to ensure the surface stays wet.

Do not allow to dry on the surface prior to rinsing thoroughly with fresh water.

Dry-off with ARID DRYING TOWEL, chamois or equivalent.

## Typical Specification :

Composition : A blend of high active surfactants, preservative, dye and water.

Appearance : Viscous liquid

Colour : Mauve

Odour : Neutral

Shelf Life : Two years minimum in unopened containers at ambient temperature. Protect from freezing.

Packaging : 1L, 5L

CODE: M-100
