

# M-12 COMPOUND

## Heavy Cutting Marine Compound:

Recommended for Gelcoat, Fibreglass and harder clear-coats to quickly and easily remove imperfections, random deep scratches, and heavy oxidation in the shortest possible time to enable the end user to deliver a unique depth of gloss mirror like finish.

**For best results:** M-12 recommended for use with Rotary for heavier surface correction. Superior Performance: M-12 is a specially formulated concentrated compound which benefits from the NEW UNIQUE DRA – (Dynamic response Abrasion) technology. DRA - incorporates (concentrated) micro precision oxides for increased cutting power and performance on gelcoat, fibreglass and harder lacquer finishes.

**Non-Cosmetic:** M-12 offers quick and easy clean-up after application, and it does not contain fillers.

**Guarantees minimal drop back on dark colours:** M-12 benefits from an improved lubrication system which can, if required, be worked for prolonged periods without drying out.

For use on: All marine paint systems including, Gelcoat, Fibreglass, Topcoat and clearcoat surfaces.

**Paintshop Approved:** Ammonia and Silicone Free – Paintable!

## Typical Specification :

Composition	: An emulsion containing inert Polishing agents, emulsifiers and thickeners.
Appearance	: Whitish
Odour	: Characteris_c
pH	: $8.5 \pm 0.5$
F.P.	: $>65^{\circ}\text{C}$
VOC	: 175.4g/Kilo
Solubility	: Miscible in water
Shelf Life	: 2 years minimum in ambient temperature. Protect from frost.
Packaging	: 1kg.
