

VISTA

LONG-LIFE SILICONE FREE EXTERIOR PLASTIC CONDITIONER

Advanced formulation to restore poor condition un-painted plastic trim.

A solvent based liquid for advanced exterior plastic trim restoration where the existing plastic has degraded and become porous, making it difficult to treat with conventional Silicone or Gel preparations.

Long-Life Conditioner with no water/rain streaks:

Vista restores degraded/faded plastic trim exteriors: bumpers, side mouldings, mirror casings, spoilers etc. , and will not streak on outside forecourt display even after repeated washing!

Excellent Coverage:

Easy to use, Vista wets out to plastic surfaces without effort for rapid re-conditioning. Stays looking good even under wet road conditions.

Bodyshop Approved:

Vista is silicone free.

Directions:

Step 1: Ensure plastic surfaces to be treated are thoroughly cleaned. Any general soiling or previous treatments eg silicone based dressings, **must be removed** as they would interfere with the adhesion and finish of the Vista coating.

Step 2: Apply to clean surfaces using a sponge or lint free cloth.

Use sparingly and work the dressing across the surface : a little goes a long way !

Allow to dry without buffing.

After one hour the dressing will not be marked by rain and will continue to cure for up to 24 hours.

Contact with adjacent paintwork: Vista has no detrimental effect if it comes into contact with adjacent paintwork, but any excess should be wiped off before the coating has time to dry.

NB. Vista is NOT suitable for use on interior plastic surfaces.

New Plastics: due to the presences of mould release agents on new exterior plastic components, Vista is not recommended for this application.

NB. Disposal of Vista application sponges or cloths. Used applicator sponges or cloths impregnated with Vista may self-ignite without warning. Sponges or cloths should be washed out in warm soapy water before disposal into metal waste container.

Concept Chemicals recommend #0262 Vista Sponge for use with Vista as these are manufactured with flame retardant sponge.

Typical Specification :

Composition	: A blend of resins in solvent with perfume.
Appearance	: Dark liquid
Colour	: Amber
Odour	: Fruity
F.P.	: 40°C
Shelf Life	: 2 years minimum in unopened containers.
Packaging	: 500ml
