

# VITESSE

## P.D.I. SPRAY WAX -EXHIBITION CARNAUBA SPEED POLISH

**Description:** Vitesse is a high quality Silicone Resin Polish containing natural Carnauba Palm Waxes for a long lasting shine.

**Very very fast:** a uniquely fast 'easy-to-apply and easy-to remove' spray wax.

**No waiting-no delays:** For high volume P.D.I vehicle processing, Vitesse can be applied even on wet paint surfaces- no problems!

**P.D.I problem solver:** non-aromatic solvent ingredient removes transit coating adhesive residues, tar spots etc.

**Very deep-gloss:** produces incredible wet-look deep gloss shine to all paint finishes\* with minimum of effort.

**Low chalk :** minimises plastic staining, no dust problems on dark colours

**Highly Versatile:** for polishing new or renovated paintwork on cars, coaches, motorbikes, trucks, boats, caravans, aircraft etc.

Vitesse is one of Concept's high technology New Millennium Polishes using the most advanced raw materials to deliver

### The World's Best Car Polish Finishes.

- For a full description of Concept polishes, and categories please refer to Concept Polish Selector Wallchart.

\*metallic, solid colours, water based etc.

**Directions: IMPORTANT** Vitesse naturally separates on standing and **must** be activated by shaking well, before use.

**Application** Spray **Vitesse onto** clean paint surface, and using a soft polishing cloth spread evenly to leave a uniform film. Do not overwork the polish during application. Allow to haze then polish up to full gloss finish using soft clean micro-fibre cloth e.g. CAP-4.

Alternatively **Vitesse** can be applied by cloth in a conventional manner provided the polish is not over applied.

**Vitesse** Spray Wax can be used either to treat one panel at a time, or alternatively the whole vehicle, before polishing off.

**Vitesse** can also be left on for days before final polishing/processing without problems. This can be extremely useful to avoid dust gathering on finished vehicles whilst awaiting collection or delivery.

### Typical Specification :

Composition	: A blend of waxes, non-volatile silicone, emulsifiers, hydrocarbon solvents, perfume, dye and water.
Appearance	: Opaque Emulsion
pH	: Neutral
Colour	: Violet
Odour	: Fresh
F.P.	: 46°
Stability	: Protect from freezing
Shelf Life	: 3 years minimum in unopened containers.
Packaging	: 1L, 5L and 25L
